

# DTE Axiom®

The ultimate time capture system for busy legal professionals is dynamic, mobile and secure. Optimized timekeeper tools and seamless implementation give you the power to capture billable time without wasting time.

## Swift and Agile

With a dedicated, on-demand time entry system, timekeepers never have to wait.

- Performance is not affected by distance or WAN speed
- Internet-based Windows application is independent of browser controls and network bandwidth
- Access is instant regardless of connection state
- High-speed searches of time and validation data generate reports quickly with no network access
- All data is cached locally at the client level, including full-validation lists
- Narrative shorthand codes expand automatically to full description text
- Nicknames and user-defined templates speed data entry
- TimeSavers track time accurately without interrupting workflow:
  - Create multiple TimeSavers for specific tasks
  - Enter client, project, time, codes and descriptions directly into TimeSavers
  - Minimize TimeSavers to the Windows system tray and switch between them with a single mouse click
  - Use TimeSavers docking bar and collapsible groups to reduce desktop clutter
  - Start a timer to create a time entry automatically with no additional steps

## Secure and Intelligent

Protecting your firm and its clients is our top priority. DTE Axiom offers:

- Industry-standard 128-bit key encryption
- Optional HTTPS secure connection that allows users to work from home, use WiFi hotspots and wireless broadband networks, and work inside a client's network
- Compatibility with your firm's existing IIS server infrastructure
- No database installation on client PCs
- Quick and easy deployment
- No use of Windows registry
- Installation from browser or via Enterprise "Push"
- Enhances current business continuity plans (BCPs)
- Multi-level, multi-tiered security to protect client information
- Ethical walls based on login or group membership to provide critical protection from internal conflicts

## Always Available

Wherever in the world timekeepers are working, DTE Axiom is right there working with them.

- Full access to all features and functions no matter where timekeepers are located
- DTE Axiom is accessible via laptop, mobile device, network or flash drive
- Timekeepers can work seamlessly, concealing the online vs. offline concept
- Rollout in local offices and deployment to international offices is fast and seamless

### Always Available (continued)

- The system supplies an additional level of fault tolerance; should the billing system become unavailable, timekeepers are not affected and can continue to enter their time
- Search across all time entries or specific time ranges
- Users can create time and expense entries and receive updates automatically without any additional user intervention
- Two-way synchronization maintains configuration, validation data, time and expense entries, TimeSavers, recent entries and personal preferences
- DTE InHand for BlackBerry Smartphones and iOS devices works seamlessly with the DTE Axiom system, giving your timekeepers an additional level of mobility

### User-Friendly

A familiar look and feel makes time capture readily accessible, increasing time-tracking productivity and streamlining workflow.

- The Microsoft Office 2007-like interface uses ribbon tool bars and intelligent grouping
- The interface uses industry-standard daily, weekly, and monthly calendar formats
- Time-entry validation is completely customizable to meet your specific needs
- User templates, Auto-Fill feature and Recent Entries list make it easy to enter repetitive tasks
- Flexibility is afforded by unlimited user-defined fields as well as unlimited billable and non-billable categories

- The built-in spell checker references Legal and Technical dictionaries, as well as any custom MS Word dictionaries created by users
- Authorized staff can review time and expense entries for a calendar day, week or month

### Cost-Effective

DTE Axiom is independent of your billing system and its simplified infrastructure reduces costs and maintenance.

- Thousands of timekeepers can be accommodated on a single server
- Firms can centralize from multiple servers to eliminate downtime and reduce hardware and support costs
- Network traffic and timekeeper workloads do not affect accounting
- Account report generation does not slow down timekeepers
- Administrative and practice management reporting is done via Microsoft SQL Server Reporting services
- Customizable HTML report formats result in easy end-user reporting
- The low monthly active timekeeper cost is based on actual users
- With this simplified licensing, you pay only for the actual number of users each month
- There are no additional maintenance fees or license fees, and software upgrades and tech support are included
